The extensive range of BioClean™ cleanroom consumables is used in more than 80 countries, supplied through an established global network of dedicated professionals. Time after time, our reputation as a supplier of high quality cleanroom products is demonstrated by our ability to deliver innovative solutions to meet the most exacting requirements of controlled and critical environments.

# About

## BioClean™ - Serving the Cleanroom Industry since 1996

BioClean™ products are part of world leading manufacturer Ansell Limited's Life Sciences Solutions portfolio. Offering the largest range of gloves under one brand, disposable garments providing head-to-toe protection, a selection of autoclavable or single use goggles, chemo safety wear for critical extra protection, facemasks suitable for all controlled environments and a comprehensive choice of essential accessories.

We're in total control of the entire manufacturing process, adhering to stringent quality systems, meeting rigorous ISO and EN regulations and maintaining continuously high standards. All BioClean products are processed and packed in an ISO Class 4 or 5 cleanroom ensuring our products are pristine to make certain your people, products and processes stay protected.

---

# Our Ranges

---

1

## Billy BioClean

the King of Disposable Garments...

BioClean-D garments are specially designed and manufactured from lightweight, low-linting material. They provide an excellent combination of both comfort and protection. The BioClean-D range provides full head-to-toe coverage in various combinations of coveralls, hoods, sleeve covers, lab coats and overboots, and is available in both sterile and non-sterile to suit all controlled environments. This ISO Class 4 Compatible series is one of the most tested on the market today, providing your operators with full head-to-toe coverage... and total peace of mind.

2

## Ms. G. Love

the Mother of all Cleanroom Gloves...

Within the extensive BioClean range of cleanroom gloves there is a product ideally suited to your particular needs, be it for personal protection or cleanroom. Our vast experience and expertise in life science cleanroom environments ensure that the range of sterile and non-sterile ISO Class 4 & 5 compatible gloves offers extreme comfort, strength and tactility. Not only are they available in a choice of lengths to provide complete protection, they are also manufactured in a wide variety of materials to suit individual preferences and applications. To compliment the glove range we have a range of sterile isolator and Restricted Access Barrier System (RABS) gloves and sleeves designed for use in highly controlled environments.

3

## Dr. IsoLator

the Guardian of Cleanroom  
Chemo Safety Wear...

The BioClean Chemo safety wear range includes aprons and gloves, and is available in both sterile and non-sterile. BioClean-C chemotherapy aprons and sleeve covers provide essential protection without compromising comfort. A selection of non-latex gloves and other accessories completes the range. The BioClean chemotherapy range of gloves has been tested against ASTM D6978.

4

## Lens Gogglestrong Clearly Focused on Product Protection...

Gamma or EtO single use? Autoclavable or VHP reusable? Designed with your SOP and operators in mind, disposable and reusable goggles from BioClean's Clearview range are manufactured from strong, lightweight and comfortable cleanroom compatible materials in a choice of styles. Both autoclavable and single use goggles have anti-fog systems, optically correct toughened lenses and indirect ventilation systems. They are suitable for those who wear glasses and are 100% latex-free.

To ensure the highest quality, every pair of BioClean Clearview goggles is individually inspected. They are suitable for cleanroom use and as safety goggles where personal protection is required.

5

## Renée Reusable the Diva of Durability...

BioClean reusable garments are manufactured from lightweight, non-linting, monofilament polyester materials, providing an excellent combination of comfort with protection.

The BioClean-R range gives full head-to-toe coverage in various combinations of coveralls, hoods, overboots, lab coats, tunics and trousers. Our garments are suitable for use in both sterile and non-sterile cleanroom environments from ISO Class 4 to ISO Class 8, and are compatible with sterilization by gamma irradiation and autoclave methods.

6

## Mr. & Mrs. Phil Trayshon the Ultra-Clean Face Coverage Team ...

When choosing a cleanroom facemask, we know that finding the balance between performance and comfort is a key consideration. The BioClean range of sterile and non-sterile cleanroom facemasks and veils provides the most comprehensive choice of face coverage when it comes to protecting your products and processes. Whether you need an extra wide breathing chamber to provide full face coverage, or a light face veil for less critical applications, you can breathe easy... we have the facemask you need.

7

## Winston Wipe the Most Clean-Cut Absorbing Guy...

We are dedicated to manufacturing top quality, low-linting, ISO Class 4 and 5 compatible wipes in a range of sizes and variety of materials that won't break your purchasing department's heart (or budget!). We have both sterile and non-sterile wipe systems to suit your every need.

BioClean™ products are designed for controlled environments where the focus is to eliminate contamination risk and improve our customers' yields.

We produce in our own ISO Class 4 & Class 5 Cleanrooms and hold ISO 9001:2015 certification.

We provide the highest quality products to meet the stringent requirements of the pharmaceutical, life sciences and microelectronics industries.

## Cleanroom Consumable Selection Criteria

Selection of your products will depend on a whole host of factors. Some questions which need to be asked are:

- Do I need sterile or non-sterile products?
- What class is my cleanroom?
- How many wearers do I have?
- Do I need reusable or disposable garments?

These are the basic questions that need to be addressed and are of vital importance. Once answered, you can then explore the more granular requirements of compatibility, certification and validation of the products needed to ensure your processes are kept intact.

Our website [www.BioClean.com](http://www.BioClean.com) has a comprehensive search facility within each product section enabling you to find the exact product match for your requirements.

Whether it's EN ISO 374 for your gloves, PPE Cat 3 for your garments, ASTM D6978 for your chemo protective wear, or BFEs for your masks, you can be confident that we will have all the information you need, in the detail you need, with the backup you need, every time.

## Quality Systems

BioClean products are manufactured under the controls imposed by our ISO 9001 certified Quality Management System. Our UK head office hold Quality System Certification issued by Alcumus ISOQAR Ltd and our manufacturing and processing plant in Malaysia hold Quality System Certification issued by SGS United Kingdom Ltd.

We provide the highest quality products to meet the stringent requirements of the pharmaceutical, life sciences and microelectronics industries. Wherever BioClean products are designed to protect the wearer from specific hazards they are CE marked in accordance with the Personal Protective Equipment Regulation (EU) 2016/425.

# Cleanroom Classification

In our manufacturing and processing facility we operate two state-of-the-art cleanrooms, an ISO Class 4 (Federal Class 10) and an ISO Class 5 (Federal Class 100).

The classification numbers are defined by the International Standard ISO 14644-1. The table below is reproduced from the Standard and shows the level of cleanliness associated with each number.

All BioClean products are processed, washed and packed in our ISO Class 4 or ISO Class 5 cleanrooms. Whilst the table below shows the requirements for particle limits for various sized particles ranging from 0.1  $\mu\text{m}$  to 5  $\mu\text{m}$ , the industry standard looks at particle levels at 0.5  $\mu\text{m}$ .

The table below shows that in our ISO Class 4 cleanroom, we are allowed no more than 352 particles of size 0.5  $\mu\text{m}$  per cubic metre, and for our ISO Class 5, this increases to 3,520 particles of size 0.5  $\mu\text{m}$  per cubic metre. To put this into perspective the average human hair is 150 times thicker than the particles we are measuring, and the average cubic metre of air outside your office has over 10 million particles of this size!

Some cleanroom operators refer to their cleanrooms as 'Class 10' or 'Class 100' using the American classification standard FED-STD-209E, which denotes the number of particles of size 0.5  $\mu\text{m}$  or larger permitted per cubic foot of air (as opposed to cubic metre). The final column of the table below shows the US classifications that are comparable to the ISO standard classifications.

ISO classification number (N)	Maximum allowable concentrations (particles/ $\text{m}^3$ ) for particles equal to and greater than the considered sizes shown below						FED-STD-209E
	0.1 $\mu\text{m}$	0.2 $\mu\text{m}$	0.3 $\mu\text{m}$	0.5 $\mu\text{m}$	1.0 $\mu\text{m}$	5.0 $\mu\text{m}$	
ISO Class 1	10						
ISO Class 2	100	24	10				
ISO Class 3	1,000	237	102	35			Class 1
ISO Class 4	10,000	2,370	1,020	352	83		Class 10
ISO Class 5	100,000	23,700	10,200	3,520	832		Class 100
ISO Class 6	1,000,000	237,000	102,000	35,200	8,320	293	Class 1,000
ISO Class 7				352,000	83,200	2,930	Class 10,000
ISO Class 8				3,520,000	832,000	29,300	Class 100,000
ISO Class 9				35,200,000	8,320,000	293,000	

## Independent Certification of our Cleanrooms at Nitritex (M) Sdn. Bhd.

Independent testing of the cleanrooms is performed annually (as outlined in ISO 14644-1) with the classifications attained and maintained as follows:

Cleanroom 1: ISO Class 4  
 Clean Corridor 1: ISO Class 4  
 Cleanroom 2: ISO Class 5  
 Clean Corridor 2: ISO Class 5  
 Changing Room: ISO Class 6  
 Carton Packing Room: ISO Class 7  
 Disposable Garment Section: ISO Class 7

---

# GLOVES

---

Within the extensive BioClean range of cleanroom gloves there is a product ideally suited to your particular needs, be it for personal or product protection.

Our vast experience and expertise in life sciences, medical device and microelectronics cleanroom environments ensures that our range of sterile and non-sterile ISO Class 4 & 5 compatible gloves offers extreme comfort, strength and tactility. Not only are they available in a choice of lengths to provide complete protection, but they are also manufactured in a wide variety of materials and colours to suit individual preferences and applications.

## **Quality Systems, Testing & Packaging**

We pay particular attention to the specifications of our products to ensure they meet the exact requirements of our customers and all relevant regulations.

We can only achieve total customer satisfaction by meeting those requirements, and do so by the rigorous implementation and maintenance of fully certified Quality Management Systems, both in the UK and at our manufacturing facility in Malaysia.

BioClean gloves are processed in our facility which holds ISO 9001:2015 certification and are washed and packed in our NEBB certified ISO Class 4 or ISO Class 5 cleanrooms.

The manufacturing, processing, inspection and packing, plus irradiation (where applicable) of our gloves, is fully certified and validated. To ensure ISO Class 4 and GMP Grade A compatibility, all BioClean cleanroom gloves undergo extensive washing with deionized water which has been UV treated.

All BioClean sterile cleanroom gloves are pair packed in plastic wallets and then in non-particulating EasyTear pouches, making them easy to open and avoiding the introduction of particles commonly associated with peel pouches. BioClean sterile and non-sterile gloves are all double-bagged.

\*Warning: No glove provides complete protection against all chemicals. Users must test the gloves against the particular chemicals and environment in which they will be used.

## Latex

Traditional material  
and still the most comfortable

### What is the difference between Type I and Type IV allergies?

Type I: The most serious and the rarest form, Type I is an immediate and potentially life threatening reaction, not unlike the severe reaction some people have to nuts or bee stings. This form of allergy is caused by a reaction to the protein in natural latex and can be acquired over a period of time due to prolonged contact with rubber products.

Type IV: Otherwise known as delayed type hypersensitivity. Allergic contact dermatitis is the main Type IV reaction exhibited as a result of continued exposure to gloves. This involves a delayed skin rash with blistering and oozing of the skin, and is usually attributed to the accelerators (certain chemicals added to the mixture) used in the gloves manufacturing process. All BioClean gloves are thoroughly washed in hot water to leach out the water soluble accelerators. However, for those that are super-sensitive to minute quantities of residual accelerators, we have products available that are 100% accelerator free.

*Are my gloves suitable for use with cytotoxic (chemotherapy) drugs?*

The BioClean Chemo Safety Wear range of gloves has been extensively tested, against the American standard ASTM D6978-05, for a range of cytotoxic drugs, measuring and recording excellent barrier performance using  $0.01 \mu\text{g}/\text{cm}^2/\text{min}$  as the permeation limit - a level 100 times more stringent than under the more commonly used European test. Please see the Chemo Safety Wear section of this catalogue for further details on glove testing.

### Why would I use a 16" (400mm) glove?

You would use a 16" (400mm) glove if protection up to elbow level was required or if there was concern that, with shorter gloves, there was a risk to the products from your skin being exposed between the glove and your sleeve.

### Are BioClean gloves anti-static?

BioClean nitrile, vinyl and polychloroprene gloves have good in-use anti-static properties, and are ideal for use in electrically sensitive areas.

## BIOCLEAR FUSION / S-BFAP

### Polychloroprene

Combines the best of latex with the best of nitrile; elasticity and comfort of latex, with the puncture resistance and chemical protection of nitrile. 100% latex-free thereby avoiding the risk of latex allergies.

*I am confused... some gloves are sold in Small, Medium & Large, others are 7.0, 7.5, 8.0 etc. Why?*

Ambidextrous gloves (which fit either hand) are generally sold in Small, Medium, Large and Extra Large sizes. Anatomical (hand specific) gloves are sold in numeric sizes from 5.5 (smallest) through to 10.0 (largest) in increments of 0.5. Small is equal to 6.0-6.5, Medium to 7.0-7.5, Large to 8.0-8.5, XLarge to 9.0 and XXLarge to 10.0. Dimensions for both types are covered under the European Standards EN 455-2 and EN 420

*Can sterile surgical gloves be taken into a cleanroom?*

This is not recommended. Cleanroom gloves should be powder-free, washed in deionized water and packed in a cleanroom in cleanroom compatible packaging to minimise contamination in your cleanroom environment. All BioClean gloves are suitable for cleanroom use.

## BIOCLEAR FUSION / BFAP

**BioClean RABS & Isolator Glove/  
Mitten/Sleeve Range**

BioClean sterile isolator and Restricted Access Barrier System (RABS) gloves, mittens and sleeves are designed for use in highly controlled environments. They have been developed to meet the stringent requirements of a pharmaceutical barrier system, when compounding or manufacturing pharmaceuticals.

Processed in an ISO Class 4 cleanroom, BioClean gloves, mittens and sleeves have incredibly low levels of particulates and are packed in cleanroom compatible packaging. Manufactured from white-coloured accelerator-free nitrile (a stretchy, chemical-resistant synthetic rubber), they are resistant to a wide range of chemicals including a selection of commonly-used chemotherapy drugs. Nitrile also exhibits excellent Electrostatic Dissipative (ESD) properties.

# BIOCLEAN-D DISPOSABLE GARMENTS

---

BioClean-D garments are specially designed and manufactured from CleanTough lightweight low-linting material. They provide an excellent combination of both comfort and protection with full head-to-toe coverage in various combinations of coveralls, hoods, sleeve covers, lab coats and overboots and are available in both sterile and non-sterile to suit all controlled environments. Our ISO Class 4 Compatible garment range is one of the most tested on the market today, providing your operators with full head-to-toe coverage.

## **Quality Systems, Testing & Packaging**

BioClean-D standard coveralls are Type 5 and 6 Category 3 compliant, which covers a wide range of tests including tear and puncture resistance, seam strength and resistance to liquids.

BioClean-D material is antistatic (EN1149-5 compliant) ensuring that any electrostatic build-up by the operator is dispersed safely and has been tested against ASTM F739-12, the cytotoxic drugs handling standard.

BioClean-D garments have excellent Helmke Drum test results (this test method simulates particle shedding of garments under movement. Results are available on request) ensuring ISO Class 4 compatibility. Sterilization is by gamma irradiation to SAL  $10^{-6}$ .

The manufacturing, processing and packing takes place in our ISO Class 4 cleanroom and the sterilization of the BioClean-D garment range is fully certified and validated to ISO 11137.

BioClean-D garments are double bagged in non-particulating EasyTear bags making them easy to open and avoiding the introduction of particles into the cleanroom.

## BIOCLEAN-D DROP-DOWN GARMENT

A new era of *aseptic donning*

### Does the zip area give the same level of protection?

Yes - providing the garment is correctly worn. The zip has a protective flap of BioClean-D CleanTough white fabric which can be closed over the zip once the zip has been pulled up. Double-sided tape on the reverse of the zip flap allows it to be secured in place so that it covers the zip completely and does not open up during movement.

### Are the BioClean-D garments antistatic?

Yes, all BioClean-D garments are antistatic and meet the requirements of EN1149-5, they have a charge half decay time of <4 seconds.

## BIOCLEAN-D LABCOAT

#### Can non-sterile BioClean-D garments be sterilized?

Whilst non-sterile BioClean-D garments cannot be sterilized as gamma irradiation would cause the material to deteriorate, we have a range of sterile BioClean-D garments available.

#### How is BioClean-D packaged?

BioClean-D garments are double bagged in non-particulating EasyTear bags making them easy to open and avoiding the introduction of particles into the cleanroom.

### What is the material used?

BioClean-D garments are all manufactured using our BioClean-D CleanTough white fabric which is spunbonded, non-woven polypropylene, laminated with a film of polyethylene. This allows comfort and flexibility during use and protection against fine sprays and particles.

---

# BIOCLEAN-C CHEMO SAFETY WEAR

---

The BioClean-C range of Chemo Safety Wear consisting of aprons and sleeve covers provide an essential layer of protection without compromising comfort. Worn with BioClean-D garments as the base protection layer the two combined provide protection from head-to-toe when handling hazardous chemicals.

BioClean chemotherapy gloves are non-latex, designed to work as a double-gloving system for extra protection and have been tested against the world's most stringent standard, ASTM D6978-05, to ensure the safe handling of chemotherapy drugs. This standard is the internationally accepted standard specifically designed for the assessment of resistance of medical gloves to permeation by chemotherapy drugs, unlike the European standard EN16523-1:2015, which is not specific to chemotherapy drugs and has no requirement to test against any cytotoxics.

To complement the chemotherapy range, the highly absorbent sterile BioClean ChemPrep Prep Mat enhances workbench safety for technicians, nurses and pharmacists when they are preparing cytotoxic drugs for chemotherapy.

## **Processing & Packaging**

The manufacturing, processing and packing in our ISO Class 4 cleanroom and the sterilization of the BioClean Chemo safety wear range is fully certified and validated.

Sterile BioClean chemotherapy garments and gloves are double bagged in non-particulating EasyTear packaging making them easy to open and avoiding the introduction of particles into the cleanroom.

	ISO Class 5 & EU GMP Grade A
	Low-linting • Latex-free • Triple laminate
	Mesh upper layer • Highly absorbent middle layer and impermeable bottom layer

Re-order Code	Size	Packing
S-BCPM-4025B	40cm x 25cm	One piece per sealed inner PE bag; one inner bag per second PE bag; 50 double bags per sealed outer PE bag; four outer bags per lined carton (200 pieces)
S-BCPM-5640B	56cm x 40cm	One piece per sealed inner PE bag; one inner bag per second PE bag; 25 double bags per sealed outer bag; four outer bags per lined carton (100 pieces)

# Chemo Safety Wear Glove Testing

BioClean Chemo Safety Wear gloves are tested against the most stringent standard, the American ASTM D6978-05 (Table 1), which employs a testing limit 100 times more stringent than its European counterpart. We do not promote our products using results achieved under EN16523-1:2015 (formerly EN374-3) as, quite simply, this benchmark is not safe when assessing the suitability of a glove for protection against cytotoxic drugs.

To illustrate how misleading the results from EN16523-1:2015 can be when compared to ASTM D6978-05, which is designed specifically for cytotoxics, we have tested our gloves using the same permeation rate prescribed by EN16523-1:2015 (Table 2). The results show no breakthrough after 480 minutes at the 1.00  $\mu\text{g}/\text{cm}^2/\text{min}$  level. We could have chosen to publish these first-class results, and foregone testing using ASTM D6978-05, but we know that exposure to even tiny doses of cytotoxic drugs can be very harmful. This is why we insist on only using ASTM D6978-05 as the benchmark for safety when it comes to glove choice.

## Comparisons between EN16523-1:2015 and ASTM D6978-05

DIFFERENCE	EN16523-1:2015 *	ASTM D6978-05 **	CONSEQUENCE
Thickness of the Test Specimens	Sample has to be taken from the palm of the glove. (EN 374-1)	Sample has to be taken from either the palm or the cuff of the glove, whichever is the thinner.	The ASTM D6978-05 requirement ensures that the area of greatest risk is assessed. The cuff is usually the thinnest part of the glove, so gloves tested under EN16523-1:2015 are not challenged as rigorously.
Test Temperature	Testing to be conducted at a temperature of $23^{\circ} \pm 1^{\circ}\text{C}$ .	Testing to be conducted at a temperature of $35^{\circ} \pm 2^{\circ}\text{C}$ .	The higher temperature specified by ASTM D6978-05 has two consequences: 1. The temperature is $2^{\circ}\text{C}$ below body core temperature, which is similar to that of a human hand. 2. Permeation rates are greater at higher temperatures, making the test more stringent.
Test Chemicals	Testing is carried out against 1, 3 or 6 chemicals from a list of 18 chemicals (EN 374-1). None of the chemicals is a chemotherapy drug.	A minimum of nine chemotherapy drugs must be used for the test. Seven of them are mandatory under the standard; the other two must be selected from a pre-defined list.	The EN374-1:2016 list of chemicals will not give a representation of how the gloves will perform when challenged by chemotherapy drugs. Users purchasing these gloves for chemo use should be advised to have them tested for suitability.
Permeation Limit	Breakthrough of the test chemical is deemed to have occurred when the permeation rate has reached $1.00 \mu\text{g}/\text{cm}^2/\text{min}$ .	Breakthrough of the test chemical is deemed to have occurred when the permeation rate has reached $0.01 \mu\text{g}/\text{cm}^2/\text{min}$ .	The ASTM D6978-05 test limit is set at 100 <sup>th</sup> of the EN16523-1:2015 limit. This requirement is far more stringent and reflects the potential hazards presented by chemotherapy drugs.

\* EN16523-1:2015 Determination of material resistance to permeation by chemicals Part 1: Permeation by liquid chemical under conditions of continuous contact

\*\* ASTM D6978-05 Standard practice for assessment of resistance of medical gloves to permeation by chemotherapy drugs

**Table 1: Mean breakthrough detection time (minutes) as per ASTM D6978-05**

Breakthrough of the test chemical is deemed to have occurred when the permeation rate has reached 0.01 µg/cm<sup>2</sup>/min

# AUTOCCLAVABLE GOGGLES

---

BioClean Clearview autoclavable goggles consist of a range of premium reusable goggles manufactured from super-soft thermoplastic or silicone rubber. Our comprehensive range fits all face shapes, remaining comfortable even during extended use. Key features of the BioClean Clearview autoclavable goggles are their anti-fog, toughened, anti-scratch polycarbonate lenses, which provide unimpaired vision. A panoramic option is available with a lens which has extra depth and width. This increases the wearer's field of vision; the goggles can also be worn comfortably over eye glasses. The polypropylene strap has a hook and eye clip for easy donning and is easily adjusted to ensure a secure and stable fit.

## **Quality Systems & Testing**

BioClean Clearview autoclavable anti-fog goggles are supplied non-sterile and must be removed from the PE bag prior to autoclaving. The goggles have been tested to withstand a minimum of 40 (BCAH 50) autoclave cycles of 30 minutes duration at 121 °C. Spare lenses and straps are available to maximise the lifespan of the goggles.

We also offer a gamma irradiatable version, the BCAH.

***What should I consider when choosing single use or autoclavable goggles?***

If you have your own autoclave/steam or VHP sterilization facilities and spare capacity, it may prove more cost-effective to purchase the autoclavable goggles. However, a more convenient solution may be a single use sterile goggle if there are no facilities to allow for convenient re-sterilization of the goggles.

### *How do I know how many times a pair of goggles have been autoclaved?*

We are able to add a polyester number grid to the strap of the goggles to identify each goggle after autoclaving, to track how many times it has been autoclaved.

### *How do I make sure my goggles are fitted correctly?*

Ensure the straps are tightened sufficiently to hold the goggles securely on the face, but do not tighten them excessively.

## BIOCLEAN CLEARVIEW AUTOCLAVABLE GOGGLES / BCAG

	Non-sterile
	>40 autoclave cycles
	ISO Class 4 • EU GMP Grade A compatible when sterilized
	PPE Category 2
	Thermoplastic rubber body • Toughened anti-scratch polycarbonate lens • Non linting head band • Can be worn over eyeglasses • Anti-fog lens • Goggles can withstand >40 autoclave cycles, with the anti-fog performance lasting for up to 25 cycles (under laboratory conditions)
	Upper & lower indirect ventilation system
	Also available with blocked upper and/or lower vents

Re-order Code	Item	Packing
BCAG	Goggles	12 pieces
BCAG-SL	Spare lens	10 pieces
BCAG-SS	Spare straps	50 pieces

1

2

### Can autoclavable goggles be irradiated?

In general, autoclavable goggles cannot be irradiated as it causes the body/frame of the goggle to discolour and deteriorate. However there is one model of BioClean autoclavable goggles that can be irradiated, the BCAH.

### Are the autoclavable goggles supplied pre-autoclaved?

BioClean Clearview autoclavable goggles are not supplied pre-autoclaved and must be removed from the PE bag prior to autoclaving and placed in an autoclavable bag, then autoclaved at 121 °C for a duration of 30 minutes.

#### 1. BIOCLEARVIEW AUTOCLAVABLE PANORAMIC GOGGLES / BCAP

	Non-sterile	
	>40 autoclave cycles	
	ISO Class 4 • EU GMP Grade A compatible when sterilized	
	PPE Category 2	
	Thermoplastic rubber body • Toughened anti-scratch polycarbonate lens • Latex-free silicone headband • Extra wide field of vision • Can be worn over large eyeglasses • Anti-fog lens • Goggles can withstand >40 autoclave cycles, with the anti-fog performance lasting for up to 25 cycles (under laboratory conditions)	
	Upper & lower indirect ventilation system	

Re-order Code	Item	Packing
BCAP	Goggles	12 pieces

# SINGLE - USE GOGGLES

---

Fully validated BioClean Clearview single use goggles are manufactured from lightweight, ultra-soft PVC and can be worn comfortably for long periods.

A key feature of these goggles is the optically correct toughened polycarbonate lens with anti-fog and anti-scratch coating, to provide unimpaired vision. The BioClean Clearview goggles strap is made from non-linting, latex-free silicone rubber, and is easily adjusted to provide a secure and stable fit. To ensure complete product protection, BioClean single use goggles have an indirect air circulation system restricting any eyelashes or eyebrows from entering the controlled environment, whilst at the same time ensuring excellent ventilation for user comfort.

Our single use goggles are fully validated for sterility and comply with ISO 11137-1.

## **Quality Systems & Testing**

For customers requiring PPE certification, BioClean single use goggles are Category 2 EN166:2001 certified and, to ensure the highest quality, all goggles are individually inspected and packed in our ISO Class 4 cleanroom.

BioClean Clearview Sterile Single Use Goggles (BCGS1) have been tested to ANSI/ISEA Z87.1-2010, the American National Standard for Occupational and Educational Personal Eye and Face Protection Devices.

As with all BioClean products the manufacturing, processing and packing of the BioClean single use goggles is fully certified and validated.

BioClean single use goggles are double bagged in non-particulating Tyvek®/PE bags compatible with cleanroom use. With the exception of the strap, all components and packaging are fully recyclable.

## BIOCLEAR CLEARVIEW SINGLE USE GOGGLES BCGS1

	Sterile (EtO)		
	ISO Class 4 • EU GMP Grade A Compatible		
	PPE Category 2		
	Lightweight PVC body • Toughened polycarbonate lens with anti-fog & anti-scratch coating • Non linting headband • Can be worn over eyeglasses

---

# FACEMASKS & VEILS

---

The BioClean range of sterile and non-sterile cleanroom facemasks & veils provide a comprehensive choice for face coverage, allowing the wearer to choose the right balance between performance and comfort.

## **Quality Systems & Testing**

Our facemasks are processed in a certified ISO Class 4 cleanroom environment and undergo rigorous testing to ensure the highest standards are met. BFE/PFE and Helmke Drum tests results are available upon request.

## **Materials & Packing**

BioClean facemasks are manufactured from the highest quality latex-free, low-linting materials and have a hydrophobic outer layer to repel liquids and a hygroscopic inner layer to absorb moisture for increased comfort.

### *What does BFE, PFE & Delta P mean?*

When selecting a facemask for cleanroom use it's important to choose one with the right filtration efficiency for the level of protection needed. The BFE % of a facemask is the measurement of bacterial filtration efficiency and PFE % is the measurement of particle filtration efficiency. Facemasks with a high BFE and PFE % are recommended for use in cleanrooms, ensuring high filtration of both bacteria and particles.

The  $\Delta P$  symbol stands for Differential Pressure (Delta P) and refers to the pressure drop across a facemask (or the resistance to air flow) and is measured in  $\text{mmH}_2\text{O}/\text{cm}^2$ . Therefore higher the Delta P of the facemask the less breathability but the better the filtration.

### *What is the difference between face veils and facemasks?*

Facemasks provide a very efficient particle and bacterial barrier between you and the product or process. Face veils should only be worn during less critical applications as their level of protection for the products is very low.

## BIOCLEAR MEA LOOPED FACEMASK

### MEA210-1

	Sterile
	ISO Class 4 • EU GMP Grade A Compatible
	INNER FACING LAYER: Non-woven polypropylene/polyethylene (hygroscopic)
	FILTER LAYER: Meltblown polyester
	OUTER FACING LAYER: Non-woven spunbonded polyester (hydrophobic)
	Ultra-low particulation • 3 ply - ultrasonic sealing • High BFE & PFE • Excellent breathability • High seam strength • Latex-free

Re-order Code	Packing
MEA210-1	One piece with clip per inner bag, 50 inner bags per outer bag, 12 outer bags (600 pieces) per carton

### MEA

	Non-sterile
	ISO Class 4 Compatible
	INNER FACING LAYER: Non-woven polypropylene/polyethylene (hygroscopic)
	FILTER LAYER: Meltblown polypropylene
	OUTER FACING LAYER: Non-woven polypropylene/polyethylene (hydrophobic)
	Ultra-low particulation • 3 ply - ultrasonic sealing • High BFE & PFE • Excellent breathability • High seam strength • Latex-free

Re-order Code	Packing
MEA210-0 (Bulk packed)	100 pieces per sealed inner PE bag; one inner bag per sealed outer PE bag; 20 outer bags per lined carton (2000 pieces)
MEA210-2* (Single with clip)	One piece per sealed inner PE bag; 50 inner bags per sealed outer PE bag; 12 outer bags per lined carton (600 pieces)
CC-FMC4 (Spare clips)	500 clips per inner bag, four inner bags per outerbag, 10 outer bags (20,000 clips) per carton

\*Packing option subject to minimum order quantity and lead time.

## BIOCLEAR DB POUCH-STYLE FACEMASK with NECK GUARD

### BDBS-G

	Sterile
	ISO Class 4 • EU GMP Grade A Compatible
	INNER FACING LAYER: Non-woven spunbonded polyester (hygroscopic)
	FILTER LAYER: Meltblown polyester
	OUTER FACING LAYER: Non-woven spunbonded polyester (hydrophobic)
	NECK GUARD: Non-woven spunbonded polyester
	Ultrasonically sealed edges • Latex-free • Large breathing chamber • Low-linting • Fully enclosed nose band
	One facemask per inner bag, 20 inner bags per sealed outer bag, 10 outer bags (200 pieces) per carton

Re-order Code  
BDBS-G

### BDBN-G

	Non-sterile
	ISO Class 4 Compatible
	INNER FACING LAYER: Non-woven spunbonded polyester (hygroscopic)
	FILTER LAYER: Meltblown polypropylene
	OUTER FACING LAYER: Non-woven spunbonded polyester (hydrophobic)
	NECK GUARD: Non-woven spunbonded polyester
	Ultrasonically sealed edges • Latex-free • Large breathing chamber • Low-linting • Fully enclosed nose band
	50 facemasks per inner bag, one inner bag per sealed outer bag, six outer bags (300 pieces) per carton

Re-order Code  
BDBN-G

#### Why are sterile facemasks more expensive than non-sterile ones?

This is not just because of the sterilization costs. The material used in masks to be sterilized is different from that used for the manufacture of non-sterile masks.

Non-sterile facemask material degrades when it is sterilized by gamma irradiation, seriously compromising its filtration performance. To obtain acceptable filtration performance after irradiation our sterile facemasks are made from a more expensive material which can withstand irradiation.

## BIOCLEAR MTA TIE-ON FACEMASK

### MTA210-1

	Sterile
	ISO Class 4 • EU GMP Grade A Compatible
	INNER FACING LAYER: Non-woven polypropylene/polyethylene (hygroscopic)
	FILTER LAYER: Meltblown polyester
	OUTER FACING LAYER: Non-woven spunbonded polyester (hydrophobic)
	Ultra-low particulation • 3 ply - ultrasonic sealing • High BFE & PFE • Excellent breathability • High seam strength • Latex-free

Re-order Code	Packing
MTA210-1	One piece per sealed inner PE bag; 50 inner bags per sealed outer PE bag; 10 outer bags per lined carton (500 pieces)

### MTA

	Non-sterile
	ISO Class 4 Compatible
	INNER FACING LAYER: Non-woven polypropylene/polyethylene (hygroscopic)
	FILTER LAYER: Meltblown polypropylene
	OUTER FACING LAYER: Non-woven polypropylene/polyethylene (hydrophobic)
	Ultra-low particulation • 3 ply - ultrasonic sealing • High BFE & PFE • Excellent breathability • High seam strength • Latex-free

Re-order Code	Packing
MTA210-0 (Bulk packed)	50 pieces per sealed inner PE bag; one inner bag per sealed outer PE bag; 16 outer bags per lined carton (800 pieces)
MTA210-2 (Single)	One piece per sealed inner PE bag; 50 inner bags per sealed outer PE bag; 10 outer bags per lined carton (500 pieces)

## BIOCLEAN DB POUCH-STYLE FACEMASK

FASTENINGS: Tubular polyester headloops	
NOSE-BAND: Plastic coated aluminium	
BINDING: White hydroentangled polyester	
	Ultrasonically sealed seams • Fully enclosed malleable nose-band • Soft & comfortable • Latex-free Low-linting
	100 pieces per sealed inner PE bag; one inner bag per sealed outer PE bag; 10 outer bags per lined carton (1000 pieces)

**Re-order Code**  
BFV05

#### BIOCLEAR MICROFLOW VEIL WITH STUDS / BFV06

	Non-sterile
	ISO Class 4
VEIL: Apertured polyethylene film	
FASTENINGS: Two male studs either side of veil	
NOSE-BAND: Plastic coated aluminium	
BINDING: White hydroentangled polyester	
	Studs either side for attaching to cleanroom hoods • Ultrasonically sealed seams • Fully enclosed malleable nose • Soft & comfortable • Latex-free
	50 pieces per sealed inner PE bag; one inner bag per sealed outer PE bag; 10 outer bags per lined carton (500 pieces)

**Re-order Code**  
BFV06

# WIPES

The BioClean range of wipes is available in a selection of sizes, a variety of materials and both sterile and non-sterile. BioClean wipes are durable with excellent absorption properties, high strength and some have ultrasonically cut and sealed edges for ultra-low particulation.

## Quality Systems & Testing

Our wipes are manufactured and processed in a certified ISO Class 4 or 5 cleanroom environment. All wipes have been extensively tested, with physical and particle results available on request.

## Materials & Packing

Available in a selection of material compositions, BioClean wipes are double bagged in non-particulating packaging making them easy to open and avoiding the introduction of particles into the cleanroom.

## Bespoke Sizes & Configurations

We are able to offer bespoke wipe sizes and packaging configurations, please contact us with the details and we will endeavour to provide the wipes to meet your requirements.

## BIOCLEAR ORYX POLYCELLULOSE WIPE

### BOWS & BOWB

	Sterile & Non-sterile
	ISO Class 5 Compatible
	Non-woven hydroentangled polycellulose
	68gsm
	Low-linting • Outstanding absorption • No optical brighteners or whitening agents

Re-order Code Sterile	Size	Packing	Fold

2

### What are the wipes' absorption rates?

The absorption rate of BioClean wipes varies per product. Please see individual product data sheets for the respective absorption rates.

### What is the shelf life of BioClean wipes?

BioClean wipes have a shelf life of five years from date of manufacture. The expiry date is located on each pack and on the carton label.

## 1. BIOCLEAR ISOPURE PLUS POLYESTER WIPE / S-BIWP & BIWP

	Sterile & Non-sterile
	ISO Class 4 & EU GMP Grade A Compatible (Sterile) ISO Class 4 Compatible (Non-Sterile)

	130gsm
	Excellent absorption properties • Durable & strong • Ultrasonically cut & sealed edges • Latex-free

Re-order Code	Size	Packing
S-BIWP-9 (Sterile)	230mm x 230mm (9" x 9")	10 bags of 10 packs each containing 10 wipes (1000 wipes) per carton
BIWP-9 (Non-sterile)	230mm x 230mm (9" x 9")	100 wipes per double bag, 10 outer bags (1000 wipes) per carton

## 2. BIOCLEAR POLYSORBRA WIPE / BPSW

	Sterile
	ISO Class 5 Compatible
	Polyurethane foam inside a stitched polyester cover
	29 gsm
	Polyurethane foam • Low-linting • Excellent absorption properties • Suitable for all surfaces • Low-linting

Re-order Code	Size	Packing
BPSW	200mm x 230mm x 12mm (8" x 9" x 0.47")	Individually packed in PE bag, 100 wipes per carton

## BIOCLEAR DUAL DISPOSABLE PP/CPE OVERSHOES

S-BDOS

Sterile

ISO Class 4 Compatible

Top: Spunbonded non-woven polypropylene fabric  
Sole: Embossed cast polyethylene film

Slip-resistant sole • Practical & durable • Latex-free  
elastic • Low-linting

One pair per sealed inner PE bag; 15 inner bags  
per sealed outer PE bag; 10 outer bags per lined  
carton (150 pairs)

Re-order Code  
S-BDOS

Size  
16" (400mm)

Colour  
White

# OVER SHOES

## BIOCLEAR DURABLEU OVERBOOTS / BDBL-16

	Non-sterile
	Non-critical environments
	Non-woven spunbonded polypropylene • Cast polyethylene laminate
	Resists tears, rips and abrasions • Low levels of particle shedding • Resistant to a wide range of liquid chemicals • High tensile strength • Slip-resistant • Elastomer coating
	50 pieces per sealed bag, eight bags (400 pieces) per carton

**Re-order Code**  
BDBL-16

**Size**  
XL

## BIOCLEAR DURABLEU OVERSHOES / BDBO

	Non-sterile
	Non-critical environments
	Non-woven spunbonded polypropylene (38gsm) • Cast polyethylene laminate (64gsm)
	Resists tears, rips and abrasions • Low levels of particle shedding • Resistant to a wide range of liquid chemicals • High tensile strength • Slip-resistant • Elastomer coating
	50 pieces per sealed inner PE bag; one inner bag per sealed outer PE bag; eight outer bags per lined carton (400 pieces)

Re-order Code	Size	Colour
BDBO-14	14" (356mm)	Blue
BDBO-16	16" (400mm)	Blue
BDBO-18	18" (457mm)	Blue

## BIOCLEAR CPE DISPOSABLE OVERSHOES CPE & S-CPE

	Sterile & Non-sterile
	Non-critical environments
	Cast polyethylene
	Low levels of particle shedding • Ultrasonically cut & sealed edges
	Sterile: One pair per inner bag, 10 inner bags per outer bag, 15 outer bags (150 pairs) per carton Non-Sterile: 100 pieces per sealed bag; 20 bags (2000 pieces) per carton

Re-order Code	Size	Colour
S-CPE (Sterile)*	16" (400mm)	Blue
CPE (Non-Sterile)	16" (400mm)	Blue

\* Subject to a minimum order quantity (MOQ)

## BIOCLEAR SAFESTEP NSO OVERSHOES / NSO

	Non-sterile
	ISO Class 5 Compatible
	Elastomer coating over non-woven spunbonded polypropylene
	Slip-resistant • Durable • Low levels of particle shedding
	100 pieces per sealed bag, four bags (400 pieces) per carton

Re-order Code	Size	Colour
NSO016	16" (400mm)	White
NSO018	18" (457mm)	White

## BIOCLEAR ESD OVERSHOES WITH CONDUCTIVE TAPE / ESD

	Non-sterile
	ISO Class 5 Compatible
	Shoe: non-woven spunbonded Polypropylene Tape: Polyester filament yarn (96%) with conductive nylon carbon filament yarn (4%)
	Non-marking conductive tape provides excellent dissipative properties • Low levels of particle shedding
	100 pieces per sealed inner PE bag; one inner bag per sealed outer PE bag; 10 outer bags per lined carton (1000 pieces)

Re-order Code	Size	Colour
ESD016W	16" (400mm)	White
ESD018W	18" (457mm)	White
ESD018B	18" (457mm)	Blue

## BIOCLEAR SLIP-RESISTANT ESD OVERSHOES / BESD

	Non-sterile
	ISO Class 5 Compatible
	Shoe: Elastomer impregnated polypropylene Tape: Polyester filament yarn (96%) with conductive nylon carbon filament yarn (4%)
	Slip-resistant • Non-marking conductive tape provides excellent dissipative properties • Elastomer coated for durability • Low levels of particle shedding
	100 pieces per sealed inner PE bag; one inner bag per outer PE bag; four outer bags per lined carton (400 pieces)

Re-order Code	Size	Colour
BESD016W	16" (400mm)	White

# **A C C E S S O R I E S**

## 1. BIOCLEAR BBC CLEANROOM BOUFFANT CAP / BBC

	Non-sterile
	Non-critical environment
	Spunbond polypropylene
	White or Blue
	Lightweight • Latex-free elastic • Universal size
	100 pieces per sealed inner PE bag; 10 inner bags per sealed outer PE bag; one outer bag per lined carton (1000 pieces)

Re-order Code	Colour
BBC-W	White
BBC-B	Blue

## 3. BIOCLEAR SUPATAC TACKY MATS / STB & STW

	Non-sterile
	ISO Class 5 Compatible
	Low density polyethylene with anti-bacterial finish
	Blue or White
	30 numbered layers • Anti-bacterial water based acrylic adhesive • Available in variety of sizes
	Four mats (each with 30 numbered layers) per lined carton

Re-order Code	Size	Colour
STB1845	18" x 45"	Blue
STB2645	26" x 45"	Blue
STB3645	36" x 45"	Blue
STW1845	18" x 45"	White
STW2645	26" x 45"	White
STW3645	36" x 45"	White

## 5. BIOCLEAR PERMAFLOW CLEANROOM PEN / S-BPFP

	Sterile
	ISO Class 4 & EU GMP Grade A Compatible
	Plastic barrel and lid
	Black or blue permanent ink
	Autoseal ink prevents drying • Alcohol resistant labelling • Fade and water resistant • Quick drying • Non-toxic
	One pen per sealed inner PE bag; 10 inner bags per sealed outer PE bag; 20 outer bags per lined carton (200 pens)

Re-order Code	Colour
S-BPFP-BK	Black Ink
S-BPFP-BL	Blue Ink

## 2. BIOCLEAR PERMAFLOW IRRADIATED CLEANROOM BALLPOINT PEN / S-BPBP-1

	Sterile
	ISO Class 4 Compatible
	Polypropylene barrel and lid
	Blue or Black permanent ink
	Alcohol resistant labelling • Fade and water resistant • Quick drying • Non-toxic
	One pen per inner PE bag; three pens per sealed outer PE bag; 100 outer PE bags per lined carton (300 pens)

Re-order Code	Colour
S-BPBP-1-BK	Black Ink
S-BPBP-1-BL	Blue Ink

## 4. BIOCLEAR PHARMA COVER / BPC

	Non-sterile (Sterile version available)
	ISO Class 4 Compatible
	Polyethylene, IPA resistant coloured thread and high quality elastic
	White
	Breathable microbial barrier • Latex-free elastic provides secure seal • Lint-free • Moisture and puncture resistant • Form fitted • Fast drying time • Easy to apply and remove
	Autoclavable at 121°C to 127°C
	See datasheet on <a href="http://www.BioClean.com">www.BioClean.com</a>

Re-order code	Size (cm)	Re-order code	Size (cm)

All sizes subject to a minimum order quantity (MOQ)

## 6. BIOCLEAR STERILE BAGS / S-BBPN

	Sterile
	ISO Class 4 Compatible
	Polythene
	Clear
	Ultraclean & low-density • Additive-free material • Double bagged • Range of sizes & thicknesses
	See datasheet on <a href="http://www.BioClean.com">www.BioClean.com</a>
	Minimum order quantity (MOQ) 2000 bags
	Range of sizes available
	See datasheet on <a href="http://www.BioClean.com">www.BioClean.com</a>
