

YOU ASKED.
WE LISTENED.

LIFEGUARD TEN-6™

CLEANROOM GARMENTS

DESIGNED WITH PEOPLE IN MIND.

Our gamma clean and sterile processed disposal coveralls with hood were inspired by the rigorous demands of cleanrooms worldwide. These coveralls are available in two different materials depending on application.

Our garments are gamma sterilized to an SAL of 10^{-6} and are ISO 5 Class 100 compatible. By building on a more generous sizing pattern, we provide a protection solution that translates into additional cost savings by avoiding unnecessary garment size increases for cleanroom operators.

SERIES

THE CLEAR CHOICE FOR ALL-DAY COMFORT AND PROTECTION

The **LifeGuard TEN-6™** disposable hooded coverall is very lightweight and features a front zip with a sealable flap plus elastic hood, cuffs, ankles, and thumb loops to ensure your garment remains secure and comfortable all day. Clean-processing makes our **LifeGuard TEN-6™** garment a low-lint option with minimal particle shedding. Strong tear resistance ensures your garment remains a tough barrier against non-hazardous liquids, microorganisms, and dry particles. Each disposable garment is *aseptic folded* and comes individually packaged and ready for immediate use.

- 1 DUSTPROOF/WATERPROOF LAYER
