

ViroGuard®

ViroGuard® offers protection against blood, blood-borne pathogens, and hazardous liquids.

This protective apparel offers breathability while still providing a barrier to many dangerous liquids and particulates. Fabric passes ASTM F1670 and F1671 tests for protection against blood, bodily fluids, and blood-borne pathogens. A combination of seamless shoulder areas, a wide gusseted crotch, and an elastic back allow for freedom of movement with better tear resistance.

Benefits

Superior Fabric

Fabric passes ASTM F1670 and F1671 tests for protection against blood, bodily fluids, and bloodborne pathogens.

High MVTR

Fabric helps prevent heat stress with enhanced moisture vapor transmission. This allows heat and vapor to escape the suit so it isn't trapped near the body.

Seamless Shoulders

Seamless shoulder areas allow for less rip outs and more movement.

Gusseted Crotch

A wider, gusseted crotch gives the wearer more room to move, bend, and crouch in all directions without ripping fabric.

Tear- & Abrasion-Resistant

Tear and abrasion-resistant fabric protects against scrapes and scratches.

Storm Flap Zipper Cover

All garments come with a storm flap over the zipper to help prevent liquids and other contaminants from entering through exposed zipper seams.

Versatile Use

Possible applications include emergency response, category 3 black water, tank cleaning, crime scene remediation, animal research, and more.
